1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1: on line 13 "bending portion" has been changed to --contact portion--, and on line 14 "contact portion" has been changed to --bending portion--.

These correct obvious errors in antecedent basis.

2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest in a disk drive actuator locking system having a bent contact portion protruding from the side surface of one actuator yoke, a bent portion extending from the other actuator yoke towards the contact portion, the contact and bent portions having contact surfaces that contact, the configuration where the contact surface of the contact portion is spaced further from the actuator arm than the surface of the yoke that it projects from.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
